

## APPLE BLOSSOM

Apple Blossom is Sempra Renewables' 100-megawatt (MW) wind project located in Huron County, Michigan. It harnesses the power of the wind, providing a new source of clean electricity and an economic boost to surrounding communities.

The project moved into full construction in fall 2016, created about 250 construction jobs at peak and approximately seven full-time positions. It utilizes 29 wind turbines, generating enough electricity to power about 38,000 Michigan homes. The wind project was completed by year-end 2017.

The entire output from the wind farm has been sold to Consumers Energy under a 15-year contract.

### BENEFITS

- Created about 250 construction jobs at peak and seven full-time positions
- Provides a new source of clean, locally produced power
- Economic benefits include new source of revenue for local landowners without disrupting agricultural operations
- Reduces greenhouse gas emissions by about 205,000 tons annually, the equivalent of taking approximately 43,000 cars off the road

### LOCATION

Huron County, Michigan

### CAPACITY

100 MW

### HOMES POWERED

About 38,000 (MI)

### WIND TURBINES

29 Vestas V126-3.45 MW turbines

### CUSTOMER

Consumers Energy

### COMMERCIAL OPERATION

Year-end 2017
