

GREAT VALLEY SOLAR

Great Valley Solar is a 200-megawatt (MW) photovoltaic solar project in Fresno County, California. It is located on approximately 1,600 acres in an agricultural area between Mendota and San Joaquin.

The project created about 500 construction jobs at peak and was completed in early 2018.

Great Valley Solar is fully contracted under four independent long-term, power purchase agreements. It generates enough clean electricity to power approximately 90,000 homes, reducing greenhouse gas emissions by about 451,000 tons annually, the equivalent of taking 86,500 cars off the road.

BENEFITS

- Created about 500 construction jobs at peak
- Generates new revenues for state and local governments
- Produces a new source of clean, emission-free electricity
- Reduces greenhouse gas emissions by about 451,000 tons annually, the equivalent of taking approximately 86,500 cars off the road

LOCATION

Fresno County, California

CAPACITY

200 MW

HOMES POWERED

Approximately 90,000

CUSTOMERS

Southern California Edison (20 MW)
Pacific Gas & Electric (20 MW)
Sacramento Municipal Utility
District (60 MW)
Marin Clean Energy (100 MW)

COMMERCIAL OPERATION

Early 2018
